

RAILWAY RADIO POPULARITY GROWS

SIR H. THORNTON ANNOUNCES
WINTER BROADCAST
SCHEDULE

A distinct and characteristically Canadian series of broadcasts for the fall and winter season has been arranged by the Canadian National Railway, Sir Henry Thornton, chairman and president of the National system of railways. In addition to continuing the All-Canada Symphony Concerts from Toronto, a series of dramatizations depicting incidents in the early history of Canada will be presented in the form of plays in which the parts of various characters will be brought about by actors of outstanding ability.

Referring to the programmes for the coming season, Sir Henry said: "Last year we brought to Canadian listeners a series of symphonic programmes featuring the world's great composers and played by the outstanding orchestras in the Dominion. The expressions of appreciation from innumerable family groups scattered across the entire country have so encouraged us that we have renewed the arrangement, and commencing October 15th, the series of 26 concerts for this season will open."

"As was the case a year ago, this will be known as the All Canada Symphony Hour and as a further symbol each Sunday at 5:00 p.m. (E.S.T.) with the striking of the great clock in the Peace Tower at Ottawa, this will be the signal for the nation of all listeners the Capital of our country and also its magnitude through the variation of time."

"Again we will feature Canadian soloists exclusively. By creating an environment and atmosphere in which Canadian artists could best express themselves we succeeded in revealing and in a measure developing a wealth of talent that I venture to say most Canadians did not dream existed. The keen interest and response on the part of our best artists was shown abundantly clearly that among them there exists a deep intensity of interest in the future of Canadian Music and Art and a keen appreciation of our efforts last year."

GRAND LODGE OFFICIAL

VISITS CONNAUGHT CHAPTER

On Thursday evening last, at the local Masonic Hall, Miss Ella Isaac, of Calgary, worthy grand matron of Alberta, O.E.S., paid her official visit to the Connaught Chapter No. 8.

The chapter room was beautifully decorated for the occasion, and Miss Ella Isaac proved a delightful soloist for the evening. In addition to a large gathering of local members visiting members were present from Irma and Hardisty. At the close of the ceremonies, a delightful lunch was served and the social hour was very much enjoyed by all.

LOCAL NOTES

Miss L. McKay who underwent an operation for appendicitis in Edmonton last week is now getting along nicely according to reports.

Miss Hazel Brunker, who recently returned from Honolulu with her mother is now staying in town with relatives for a short holiday.

At the end of last week threshing was again started after the rain period, but Monday's rain has again put a stop to operations until the grain dries out once more! The rain appears to have been pretty general all over the north of the province too!

Mr. T. Coe, of the Electrical Engineers Ltd. of Edmonton, who will have charge of the installation of the electric motors and pumps for the new fire protection system for town, was here on Saturday to commence the work.

Raise More Geese

Geese raising does not receive the attention by the farming community that the business warrants, assert poultry experts of the Dominion Department of Agriculture. The farm is the natural habitat of the goose, providing those two great essentials to successful geese raising—free range and an abundance of green food. Raising a flock of geese is one means by which the farmer can reap a good reward with a very small investment and comparatively little labour. Geese command a good price on the Christmas market and the demand is always greater than the supply.

FASTEST STEAM-DRIVEN GIANT ON WHEELS MAKES ITS APPEARANCE

The fastest steam-driven giant on wheels ever to make its appearance in Canada, the Hudson locomotive, 5700, was released September 16, from the shops of the Montreal Locomotive Works, to haul the world's fastest train "The International Limited" of the Canadian National System from Montreal to Chicago. This is the first of a family of five. The remainder will be delivered within a month.

To keep to schedule, 5700 will move times have to travel at the rate of 80 miles an hour. Its driving wheels are 80 inches in diameter, the largest in Canada. The drivers of the monster 6100 are seven inches smaller in diameter.

From end to end, the new Hudson is 92 feet five and three quarters inch long and weighs, engine and tender more than 331 tons. The water and coal capacity of the tender is greater than that of any other locomotive on the system, twenty tons of coal will be carried and 14,000 imperial gallons of water. The boiler pressure is 275 pounds; the maximum tractive power without the booster, 45,300 pounds; with the booster, another 10,000 pounds may be added.

PROVINCIAL CABINET RE-ORGANIZATION DUE

REID BECOMES MINISTER OF LANDS & MINES DEPT. FISHERIES UNDER HODLEY

Announcement was made on Saturday by Premier Brownlee of the creation of a new provincial department of "lands and mines" with the Hon. R. G. Reid, provincial treasurer and minister of municipal affairs, as its administrative head.

Following the agreement made between the provincial government and the Dominion parliament, and ratified at the last session this new department will administer the greater portion of the natural resources which are being returned to the province to day Wednesday, October 1st.

As the new incumbent of the office is already holding two portfolios, the cabinet it would seem obvious that a cabinet shuffle is imperative and in the words of the premier "the re-organization of the provincial cabinet will follow soon."

The fisheries department said the premier would be continuing under the direction of R. T. Rodd as already announced. This department for the time being at least, would be under Hon. George Hodley, minister of agriculture and health, in order to link it up with the game guardians work of being the custodian of the government to consolidate these two branches and use the same personnel for protective work. This would eventually lead to a reduction in staff, particularly in the game and fish protective season.

This consolidation of protective work would be extended by use of force, rangers who would also act as game guardians.

The Honey Crop

Honey production in Canada despite a lowering price average shows a big increase in both volume and value. Much of this increase has been due to the help provided apiarists through the research work of the Bee division of the Dominion Department of Agriculture. In 1927 the nine provinces produced a total of 23,196,493 pounds of honey, which, selling at an average price of thirteen cents a pound was worth \$3,936,558. In 1929 the production amounted to 30,978,735 pounds. This sold at an average price of eleven cents a pound, giving a crop value of \$3,407,657. Ontario is the largest single producer of honey the 1929 crop amounting to 17,000,000 pounds, while Prince Edward Island produced only 14,050 pounds.

A driver's license and several other articles which were stolen from the residence of Mr. M. H. Williams, son about three weeks ago were found recently at Lashburn, Sask., when three men were arrested there.

WEDDING BELLS

COMEAU—LITTLE

On Saturday last, at the home of the bride's parents, the Rev. W. S. Brooker, of St. Andrew's church, celebrated the nuptials between Miss Eve Jane Evelyn Little and Mr. Gerillien ComEAU, both of Wainwright. The happy couple will reside in Wainwright.

BAD WEATHER IMPEDES HARVEST

CROP REPORT SHOWS THAT THRESHING WHEAT NOW NEARING COMPLETION

General. Taking the Prairie Provinces as a whole, threshing is well advanced with wheat 70 per cent completed. Recent wet weather has impeded grain harvesting, particularly in the Northern section of Saskatchewan and Alberta. Yields are better than those of last year, and up to the present the grades are good but following the recent wet spell some deterioration may result. In Quebec wet weather has delayed the complete average yield is 9 to 12 bushels, showing a heavy yield of good quality. In Ontario threshing is nearing completion under favourable weather conditions. Grain yields, on the whole, are above the average and of good quality. In the Maritime Provinces the weather has been so good that grain harvesting is practically finished and the crops are a good average. In British Columbia the weather has been cooler, with a touch of frost, reported in the interior of the Province. The threshing of grain is completed and the crop is about 80 per cent average and of good quality.

Alberta. Northwestern Threshing is about 10 per cent completed, wheat yields are from 8 to 30 bushels, oats about 30 bushels. Southeastern Alberta. Threshing is 65 per cent completed, wheat yields are from 10 to 20 bushels, oats about 30 bushels. Northern area. Threshing is 75 per cent completed in the North and 75 per cent in the south. Yields vary from 5 to 30 bushels, grading No. 2, oats yield about 30 bushels. The digging of beets has commenced earlier than usual. Saskatchewan. Northern area. After a week of steady rain, threshing which is about 60 per cent completed is now being resumed and 10 to 14 days will be required for completion. Rain has caused sprouting in some sections with resultant deterioration in grain. Southern area. Threshing is 90 per cent completed. Recent rains in some localities will assist fall cultivation.

CARD OF THANKS

It is with sincere gratitude that we acknowledge the thoughtful and generous kindness of our many friends during our recent bereavement in the loss of a loving husband and father.

Mrs. M. McIntee & Family

Pete Jensen, of Ayr, is now enjoying the service he is receiving from his new Chevrolet truck he purchased last week.

Like the human mind, the atmosphere is subject to the " doldrums " when there is a state of depression. Such a condition of instability is responsible for the West Indian hurricanes, Charles L. Mitchell, of his weather bureau, declares.

"I must know what's in that will!" To learn this see "A Southern Cinderella" on October 29th.

FARMER POOL MAY BUILD REFINERY

FURTHER EXPANSION PLANNED BY OIL GROUP FOLLOWING TARIFF CHANGES

EDMONTON.—A new oil refinery in Alberta, located in either the Wainwright or Turner Valley fields and run on a co-operative basis will likely be one of the next developments in the gasoline situation. The establishment of such an industry is expected in the fairly near future and according to D. M. Mallin, who is in charge of organization work for the Alberta Oil Pool, the new refinery on gasoline will have the effect of speeding it up. "The price of gasoline in this province," said Mr. Mallin "is based on importation not production costs. At the present time there are no co-operatives in the refining business and the result is that the tariff revision will mean higher costs to the co-operatives putting them, in some cases, in a position where they cannot compete. The solution is for them to establish a refinery of their own, and I expect this will be done before long."

The oil pool organized last spring is now a going concern with selling stations in various parts of the province and plans on foot for further expansion including the establishment of a refinery. It owes its existence to U.F.A. initiative, the agricultural consumers of oil and gasoline having been mainly interested in the effort

SHOULD NOT TRY COMPETING WITH RUSSIA

QUEBEC.—Talk of world over-production of wheat in his opinion wholly unwarranted, Dr. W. W. Swanson, of Saskatoon, head of the department of economics of the University of Saskatchewan, said prior to sailing for London.

Dr. Swanson is one of the wheat experts attending the London conference in an advisory capacity. Wheat is the world's basic food; there has never been any true surplus of food and there probably never will be, Dr. Swanson said. "There certainly is none at present."

In regard to Russian interests selling wheat short on the Chicago exchange, Dr. Swanson said this was a single incident in a general policy of dumping wheat which Russia could easily and profitably consume at less than a price which would maintain reasonable standards of living to the producers.

Assuredly Canadian farmers could not and would not attempt to meet such competition, the economist said.

ANNUAL FIRE LOSS EXCEEDS FORTY MILL.

Fire Prevention Week which is set for next week October 5th to 11th has been in force for a number of years and has been made so by a Proclamation of this Dominion Government, because of the fact that the average annual loss by fire exceeds \$40,000,000 and that more than 200 persons annually lose their lives as a result of fire.

This waste represented in terms of human life, money, labor, time and natural resources, cannot be re-created but is an absolute and irretrievable loss. It is largely distributed over the entire population through the agency of fire insurance which imposes an in-comparable and burdensome tax upon industry.

Reliable statistics show us that at least 80 per cent of the fires which occur are due to carelessness or ignorance and neglect, and are therefore preventable and that the exercise of reasonable prudence and proper carefulness on the part of responsible individuals would reduce the losses by fire in Canada to the comparatively insignificant proportions of losses in other countries.

It is very desirable that the attention of the public be directed to the extent and underlying causes of the preventable loss of life and property and to the fact that the control and prevention of fire is a task which can be properly delegated to the dissemination of such information.

ELITE THEATRE HAS "A LADY TO LOVE"

VILMA BANKY & VICTOR SEASTROM MAKE JOINT TALKING DEBUT

"A Lady To Love" starring Vilma Banky which will open at the Elite Theatre for 3 days beginning Thursday was made by the last of the "Big Ten" of film directors to embrace the new medium of talking pictures.

Victor Seastrom delayed in starting his first vocalized production, not because he doesn't like dialogue films but for the reason that during all 1928 he took a year's vacation at his old home in Sweden; his first leisure period since making of "His Who Gets Slapped" "The Scarlet Letter" and "The Divine Woman."

In "A Lady To Love" Seastrom is said to offer a new treatment of the old problem of an old man with a young wife. Miss Banky has the role of Lena, a waitress who accepts by mail the proposal of an Italian vineyardist of California. Buck, played by Robert Ames who came direct from "The Troubadour" with Gloria Swanson, is the young Irishman whose picture Tony, the fifty-year-old bridegroom to be, slips in his letter of proposal. Tony is played by Edward G. Robinson of "Kibitzer," "The Racket" and other successful stage productions.

The role of Father McKee is played by Lloyd Ingraham of "The Show Boat" "The Night Parade" and "So Long Letty" Anderson Lawler came from the stage ("Cante" "Saturday's Children" and "Her Cardboard Lover") to do the young country doctor. Richard Cade the comedian, is a rural free delivery postman a pivotal character. Gum Chin, the Chinese comedian, and George Davis of "Devil May Care" and "It's a Great Life" complete the list.

\$20,000,000 VOTE RIGIDLY CHECKED

PROVINCES & MUNICIPALITIES MUST JOIN IN GENERAL EMPLOYMENT SCHEMES

OTTAWA.—Four million dollars for "direct relief" is set aside as a maximum for this purpose under the regulation officially announced respecting the \$20,000,000 unemployment measure passed at the special session of parliament. It is understood that the money will be available immediately to meet conditions in certain localities especially.

This amount of \$4,000,000 is stipulated to be paid one-third of the expenditure of municipalities for direct relief where suitable work cannot be provided for the unemployed and one-half of direct relief in unorganized districts. The minister of labor is empowered to enter into agreements with provinces for payment by such provincial governments of one-third of municipal expenditures for such direct relief.

Provision is also made for the minister of labor to enter into agreements with provinces for a 25 per cent Dominion contribution, 25 per cent provincial contribution and 50 per cent contribution from municipalities for construction of such public works and undertakings as may be necessary to provide suitable work in municipalities for the unemployed.

A certain elasticity where municipalities are unable to bear the burden of a 50 per cent contribution is provided for in respect to varying the proportion of the cost to be borne by provincial and Dominion governments. In the case of the carrying on by provincial governments of public works and undertakings, the municipalities are to assist in providing suitable work for the unemployed, agreements may be entered respecting the cost to be borne by the provincial and Dominion governments "in such proportions as may be agreed upon."

Payment of fair wages and provision for an eight-hour day stipulations that political affiliation should not interfere with the giving of jobs and a clause for preference to residents in the localities in which the works are being constructed are also included in the regulation. The provincial governments are to furnish certificates to the Dominion authorities in respect to the expenditures.

The regulations announced by Hon. G. D. Robertson, minister of labor were approved at a meeting of the cabinet.

DONATIONS TO THE HOSPITAL PANTRY SHOWER

This week sees still more donations for the hospital pantry in the shape of three sacks of potatoes and a quantity of cabbage and turnips from the farm of Mr. Tom Hill, as well as a large quantity of cabbage and other vegetables brought in from the "barvest home" services of the Anglican church at Hill Edge. There are a large number of empty sealers at The Star awaiting exchange, and our lady readers are asked to remember this before completing their fruit canning for the season.

GOV'T EMPLOYEES INVOLVED IN TRANSFERS

CHANGE IN RESOURCES CONTROL ON OCT. 1 AFFECTS LARGE STAFF

OTTAWA.—When the western provinces take over the natural resources to day (Oct. 1) in sequence to the agreements ratified by themselves and the Dominion parliament, about 850 government employees will be affected. Of these 350 are in Ottawa and 500 outside.

Of the former a good number have either been absorbed into other departments of the civil service or else placed on a preferential list in that connection.

Several attending the age limit retire on pension. Under the arrangement the Dominion government discharges its full obligation allowances. Those who retire get all they would have been entitled to under the conditions heretofore prevailing.

Those who go to the provincial service are paid what is coming to them in respect to the retiring fund. Any arrangement for the future however has to be made with the provincial governments.

Blackboards have been made of glass after many experiments. In making the glass about twenty-five per cent of black chrome, a mineral consisting of oxides of iron and chrom

FUNERAL SERVICE LATE MR. HEDLUND

The mortal remains of the late Chas. J. Hedlund whose passing was reported in our last issue, were laid to rest on Wednesday last at Wainwright cemetery.

The first portion of the service was conducted at the United church where the pastor, Rev. W. H. Hinton, preached to a large congregation which had gathered to pay their last respects taking as his theme the words of the nineteenth psalm.

During the service, favorite hymns were sung by all, these being "Shall we gather at the river?" "Lead, kindly light" and "What a Friend we have in Jesus."

Followed by a long procession to the cemetery, the same minister conducted the last rites at the graveside. Among the floral offerings of esteem were—Pillows, Sticks and Charbonnets, Lewis and Victor; Emel, John, Albert and Mary; Aprays, Mr. and Mrs. J. Chynoweth, Mr. and Mrs. J. Nordstrom, Rose Willow W.L., Mrs. A. Dahlgren, Mr. and Mrs. Dahl, Mrs. Dan Murray, and others.

Members J. Genderson, E. Wilson, F. Genderson, F. Lowe, P. Murray, and E. McLean acted as pall-bearers.

EIGHT PER CENT FIRE LOSS PREVENTIBLE

FIRE PREVENTION WEEK SET FOR WEEK BEGINNING OCTOBER FIFTH

By proclamation from Ottawa the week beginning October 5th has been declared fire prevention week. As pointed out in the official document the average loss of insurable property by fire in Canada is over \$40,000,000 and the annual loss of life from the same cause averages 200 persons. This waste of life, money, labour, time and resources is irreparable loss and imposes a tax on industry and a burden on the cost of living. Reliable statistics show that at least 80 per cent of the fires causing these losses are due to preventable causes, therefore "Fire Prevention Week" is organized to inform all Canadians the need for fire prevention. The municipalities are requested to do everything in their power to enforce fire prevention measures, teachers are exhorted to talk to the children on the subject, householders are requested to clean up from autumn fires, to remove inflammable rubbish and one and all are asked to join in the crusade against "fire."

We understand that during the week specified, the Council will conduct a rigid inspection of yards, lots, buildings, shops, etc. in order to reduce fire hazards to a minimum. Please give your co-operation.

Crop Rotation

The maintenance of soil fertility is absolutely essential to successful farming. Unless the soil is in fertile condition it is impossible to produce large crops and large crops are a prerequisite to profitable farming. observe field husbandry experts of the Dominion Department of Agriculture, the adoption of a good system of crop rotation involves no additional expense and is the most effective way in which to maintain the fertility of the soil and thereby increase the yield of farm crops. In addition, crop rotations assist in the control of weeds and help to keep in check insect pests and fungous diseases. The labour on the farm, too, is better distributed throughout the season when situated acreages of various crops, planted and harvested at different times, are grown in rotation.

Mr. R. E. (Roy) Williams, managing director of the Fabyan Petroleum, left on Saturday for Saskatoon and Regina. He is there to interview officials of both cities regarding the supplying of natural gas from the company's two producing wells at Fabyan.

The Dekan Grotto club are advertising a big series of Whist parties for the winter months. Prizes are to be given to the winners each first and third Fridays and in addition a valuable prize will be presented for the winners of the grand aggregate at the end of the series.

Two English physicians have formed a theory that a ring of electric current, surrounding the earth in much the same manner as the more material rings of Saturn surround that planet, cause the magnetic storms that upset cable and telegraphic communications.

PREMIER BENNETT NOW IN LONDON

SPECIAL SESSION GIVES WIDE POWER TO NEW MINISTRY

The first session of Parliament with Mr. Bennett as Prime Minister is over, and while there will not be unanimity of opinion as to the effectiveness of legislation passed in meeting the unemployment situation there is agreement that Mr. Bennett carried out one of the pre-election promises in assembling Parliament in record time and of disposing of the business of the session in like manner.

Details of the expenditure of the \$20,000,000 voted for unemployment relief will only develop as appropriations are made during the next six months, though the general outline of the government's intentions were made clear to the House. This measure, of course, was of an emergency character.

The substantial legislation looking to definite economic improvement was that affecting tariff schedules on key industries and the alteration in regulations upon which dutiable values may be fixed. The latter phases of this feature of the government very radical power in effect the Ministry now possess all the authority required to lower or raise duties by Order-in-Council. The tariff becomes a flexible instrument, instantly available to meet any conditions. One before session power was taken by a government in respect to natural products. This is now extended to cover manufactures and will be applied, Mr. Bennett said, to "give Canadians an equal opportunity in their own country."

The most interesting phase of application of this flexible feature of the government will be the effort to safeguard the rights of the consumer. The Minister of National Revenue, states this will be done, but both Liberal and Progressive members doubted the possibility. Mr. Bennett is now off in London at the Imperial conference, where economic developments which will be of transcendent importance to Canada, may be expected.

SINCLAIR GIVEN \$72,500.00 CHEQUE FOR OIL INTEREST

NEW YORK.—The largest cash transaction in the recent history of the oil industry was completed in Jersey City when Edward G. Seubert president of the Standard Oil Company of Indiana, gave to E. W. Sinclair, of the Sinclair Consolidated Oil Corporation, a cheque for \$72,500.00 for the latter company's one-half interest in the Sinclair Crude Oil Purchasing Company and the Sinclair Pipe Line Company. The names of the companies acquired will be changed to the Stanolind Pipe Line Company and the Stanolind Crude Oil Purchasing Company, it was announced.

LOCAL NOTES

Mrs. P. Brumard is entertaining a guest in the person of her brother, who arrived from Joazeiro, Que., last week for a holiday.

Several little colonies have been enjoyed during the past week at a number of homes where the hostesses have had as their guests the Misses Huxley and Ledingham of the hospital staff. These two young ladies left on Tuesday for their homes after which they will both proceed to Nampa, Idaho, to take up post graduate hospital and medical work.

We understand that wedding bells rang in Edmonton on September 20th for Miss Doris Tansey and Mr. Fred Hyland both of Wainwright.

Holding Doesn't Pay

The Poultry Division of the Dominion Department of Agriculture calls attention to the fact that it does not pay to hold eggs for a rise in the market. Past experience proves that holding eggs is a decidedly unwise practice and does only harm to the egg trader in general, particularly when eggs are held under any condition other than up-to-date cold storage. The old practice of country stores holding eggs for mixing with fresh stock on a favourable market has almost entirely disappeared and in any event grading shows the old eggs up at the price. Fresh eggs expect to get what they buy. Eggs should be shipped promptly to market at all seasons of the year.

HINTS FOR TINY SALADS

Very often company comes unexpectedly and you want a salad that may be prepared almost instantaneously.

One half orange out in pieces, one half sliced banana, one slice diced pineapple, and one tablespoon of lemon walnut dressing, mixed together and placed on a bed of lettuce will make a very pleasing salad.

Thin slices of orange added to watermelon balls and cantaloupe balls may be served with a French dressing.

A very unusual salad may be made by dipping orange slices in slightly warmed honey which has been placed in a flat bowl or saucer, then dipping both sides of slices in coconut. Arrange on a bed of lettuce and garnish with dots of candy or maraschino cherry pieces.

THIRD AVENUE

R. M. DURRANT, Mgr.

Phyllis In A Fix

(Continued)

Miss Hepzibah, observing from afar that Ronnie was momentarily engaged—and having a few minutes respite herself—deemed that the time was ripe for the little explanation of the notebook and forthwith came striding determinedly upon the scene. And simultaneously a bona fide tramp who disliked work when he could live comfortably by other means and who had been skulking around all day on the chance of a little lucrative business saw and seized his opportunity.

Ronnie was about twenty yards away, with his back to the tent, which was pitched close to the hedge. In the hedge just behind the tent was a convenient gap, just large enough to admit a man; and through this gap our wayward gentleman cautiously wriggled.

Crawling beneath the tent-flap, he grabbed everything that he could get his dishonest hands upon, squirmed back through the hedge and vanished from sight down the lane beyond.

Ronnie saw nothing of this bit of byplay. Neither did Miss Hepzibah who had just reached the meadow. For her gaze was riveted upon Ronnie who was leaning over the hedge in conversation with the most disagreeable-looking tramp she had ever set eyes on. And even as she gazed a sentence caught her ears which arrested her progress with a jerk.

'What's the game?'
'Game! What was the meaning of this? How came young Smith to be so familiar with this villainous-looking tramp.'

That fatal notebook had sown the seeds of suspicion in Miss Hepzibah's breast. And now drawing back into the shelter of a clump of blackberry bushes, she deliberately listened—listened to damning words and phrases which ripened that seed of suspicion, as it were into full flower.

And at the termination of the interview she lay in ambush, waiting for Ronnie to come along and explain away the sinister business if he could.

But Ronnie did not come. His first action, on leaving Bob Dawson, was to return to the price tent. And at sight of the devastation therein, the truth, burst upon Ronnie. In his brief absence someone had got into the tent and made practically a clean sweep of everything.

The gap in the hedge and the imprint of a big boot in the half-dry ditch alongside the nutmeg box—the theft had been accomplished. And with but one thought in his mind—to overtake and force the microscopical—Ronnie crashed through the hedge in his turn and dashed in pursuit.

Meanwhile, in the vicinity of an open-air platform, hung with flags where the prize-presentation was to take place, people were beginning to get impatient.

The Mayor of Southcliffe, with a carefully prepared little speech on the tip of his tongue, was waiting to make the presentations. The lucky winners were lined up, eager and expectant. But 'Mr. Smith' the organizer of the competition, was not there—neither were the prizes.

'What's the matter? What are we waiting for?' came a questioning murmur from the expectant throng.

Phyllis looking her sweetest—and up to this moment looking her happiest glanced round nervously. Where was Ronnie? Why didn't he come? And it was at this critical moment that she caught sight of her aunt thrusting her way towards her.

'Is young Smith here?' she demanded as she reached her neck.

'No! A swift presentation of disaster gripped Phyl at sight of Miss Hepzibah's grim face. 'We are just wondering—'

'Then it's true broke in her aunt ambiguously. And suddenly thrust a pocketbook beneath Phyl's surprised eyes. Look at that! I found it on the veranda after Mr. Smith had gone last evening.'

Phyllis looked, saw that betraying R. Weston and gasped knowing that Nemesis was upon her. Miss Hepzibah watched her changing color mercurially.

'You know!' she challenged. 'You know this man's name and yet Mr. Smith—that he was an impostor?'

'Auntie—'

'We'll have this matter out later. There's no time to waste now,' announced Miss Hepzibah in awful tones. And then she wheeled round and addressed the gaping crowd. 'I very much regret to inform you, she stated, that the young man calling himself Smith is an impostor—and a thief. A few minutes ago I found him in conversation with a most respectable person, obviously of the criminal class, for I distinctly overheard his illusion to goal being his natural home.'

'Considering it my duty to listen, I gathered from this that some sinister plot was afoot in which this person was to act as accomplice. But I did not realize its nature till I went to the tent where the prizes were displayed. All the more valuable ones, including a gentleman's gold watch and a lady's flexible bracelet watch were gone. And the person styling himself 'Mr. Smith' was gone too!'

Constitution broke loose at the conclusion of this dramatic revelation. Miss Hepzibah was eagerly pressed for a description of the 'tramp' which she faithfully gave. And then the crowd split up into groups, and in high excitement—not unmixed with glee on the part of the unsuccessful competitors—dispersed to round up the supposed thief.

It was the group with the Mayor at their head who drew, as it were, first blood.

Tramp number one, in the person of Mr. Bob Dawson was partaking of a hearty meal—in which a bottle of beer figured prominently—by the wayside when they came upon him.

And his expression of dazed mystification at their unexpected onslaught gave place to a broad grin as the leader, in impassioned tones, explained the nature of the charge.

'My dear old fruit,' Bob murmured at the conclusion addressing the party, 'I am slightly comatose. Mayor, You've hit the trail. In other words you've crashed into a jolly old man. Know Ron Weston? Of course I do. We were school kids together and his dad's got a block of offices in City Buildings. Highly respectable people I assure you. Hike me along to the jolly old lock-up by all means, if it will make your bunch happy. But warn you, the laugh will be with me, and the drinks will be on you. Well, what about it?'

He reddened upon a mossy stone and grinned at them. The Mayor nipped his heated brow and wavered in an agony of indecision. For despite his general appearance, Bob's public school accent and airy manners carried conviction.

Miss Hepzibah however, intervened authoritatively.

'That's the man!' she declared. 'Good heavens, are you going to allow an impudent thief to slip through your fingers? I insist that you have him searched.'

Further words were drowned in a sudden hubbub which arose from just around the bend of the lane in which they were gathered. And simultaneously another group appeared and converged upon them.

In the centre of this second batch marched Ronnie, his boyish face flushed with pardonable pride. Immediately behind him came a couple of hefty policemen. And between them, wearing a weary but resigned expression, was tramp number two!

'It was all my fault!' declared Phyl. 'I'm to blame for all this frightful muddle.'

She looked remorsefully at Ronnie as she spoke. After explanation had been made, misunderstandings cleared up and things had simmered down generally, the young pair with drew to a secluded strip of beach to talk matters over.

Ronnie shook his head in emphatic denial of her statement and squeaked her arm.

'Not a bit!' he declared stoutly. 'Bob Dawson's responsible for the whole mix-up. If he hadn't come along looking like a prize Weary Willie—his people are always on to him about it—the thing wouldn't have happened at all!'

'Well, the part in which auntie was concerned was my doing, anyway insisted Phyl. 'Was she frightfully upset when you told her about—about that smashup business, I mean?'

'Rather not!' declared Ronnie, with a cheery grin. 'She said it was a jolly good likeness of you and admitted she might have done the same sort of thing when she was a girl. What's more—'

His grin deepened at the remembrance.

'What's more, your aunt asked me to help her in the raffish department at the bazaar she's getting up in the autumn.'

SLATS' DIARY

By Ross Farquhar

Friday—well I was mighty pleased with what Jane said to me today while we were walking to school to gather after lunch.

We were a twinking about folks which got married to one another and won 2 fokes goes to gather for a long time like from school days up.

she said she was of the kind of type which is called a 1 man girl.

So that is 2 of the things which has made this a

perfect day. the other 1 is that tomorrow is Saturday.

Saturday—Bitterly disappointed tonight when I went down town and seen Jane and Ted cutting ice cream cones to gather. I remembered about her a telling me she was a 1 man girl. So I have about decided I am not the man. But what do I care easy

ways. Its a wise wirm that never

Sunday—well we've got a new preacher at our church. But Aunt Emmy doesn't think she is a going to care very much for him. She said she never had no use for Southern men and this preacher is from South Dakota.

Monday—I guess it ain't a very good thing to take a live mouse to school with you. I tuk I wish we cot in are trap and when I left it out on the floor why the teacher fainted and an other teacher had to give her noo matick sprits of mezmossia and the primsie got me a licking. I hope they dont wirry ma with the story.

Tuesday—We met a ole friend up at the city tonite she was whealing a baby in a carriage and Ma sed to her well it sure looks like Ben witch was her husbands name, and ma felt offy cheap a little later when she found out it was her defers baby.

Wednesday—well I am, in my room ery tonite and very hungry to. I was late getting home tonite and ma telephoned to Blasters and Jake and to Pug and to Silmy and ast them if I was at there house. And all of them sed I was at there house. I guess I am lucky at that! I mite of got a lamazoo.

Thursday—ary teacher can make mistakes. She told us yesterday, that if we want enny thing snuff it will happen but I wanted Chicago to be the capital of Illinois but when my paper cam back I seen it were not. I dont believe in filosofy enny more.

Few people appreciate the dollar value of agriculture in Canada, or realize that it is really a big business. The Dominion Bureau of Statistics estimates the agricultural wealth of the Dominion as for the year 1929 at the huge sum of \$7,978,635,000. This figure is made up out of the following estimated values: Land—\$3,316,061,000; buildings, \$1,382,684,000; implements and machinery, \$665,172,000; livestock, \$864,167,000; poultry, \$63,854,000; animals for fur farms, \$19,477,000; and agricultural production, \$1,667,218,000.

Here and There

(613)

The first electrically-driven tug to be built in Canada was launched at Lauzon, Quebec, recently, when the "Prescott". Diesel-electric tug for the Canadian Pacific Car and Passenger Transfer Company's service between Prescott and Ogdensburg, was launched into the waters of the St. Lawrence after the traditional bottle of champagne had been broken and the toast was given by Mrs. M. McDuff, wife of the manager of the Canadian Pacific Great Lakes Service. It is the first electric tug to be built in Canada, and is designed to tow a three-track railway car-float with accommodation for 16 hundred-ton cars.

Canada is taking advantage of all opportunities to fight tuberculosis and it is far ahead of England in the matter of sending students to sanatoria to make an intensive study of the subject, said Dr. J. J. Coult, of London, member of the group of British Tuberculosis experts, interviewed aboard the S. S. Montcalm, which returned to England after some weeks' stay in the Dominion.

Stating that the Canadian Chamber of Commerce official tour of Japan and China leaving Vancouver and Victoria October 16 aboard the S.S. Empress of Russia, offers a splendid chance to emphasize Canada's position as a trading nation. Col. J. H. Woods, Calgary publisher and president of the Canadian Chamber of Commerce, speaking to 300 members of the Vancouver Board of Trade in an address at the Hotel Vancouver recently, urged Canadians to take full opportunity of the chance afforded by the tour.

Canada's wild life has a capital valuation of one billion dollars and represents a yearly business turnover to the Dominion of about \$45,000,000. Dr. H. P. Lewis, of the Department of the Interior, told the delegates to the Provincial Dominion game conference at Ottawa the other day. The valuation includes the fur harvest, game fish and their attendant effect upon the manufacturers of firearms and fishing tackle not to mention rail-ways, tourist camps, magazine publishers and others who derive a certain revenue from this source.

Badges will be worn by all big game hunters in New Brunswick during the season opening September 15 for deer and October 1 for moose. The Department of the Interior has provided a satisfactory plan to render extension of the plan to shooting advisable.

This year's crop of grapes in the Niagara fruit belt, between Hamilton and Niagara Falls, Ont., is expected to reach about 58,000,000 lbs., an increase of 15 per cent. over the 1929 crop. The crop is now being harvested.

A shipment of 128 live cattle from the farms in Ontario, bound for recently to England, the first in 18 months. It was consigned to buyers in Manchester. The shipment, though comparatively small, is regarded by the live stock trade as marking resumption of Canada's export trade in cattle to the British market.

Wainwright Branch - - G. C. Siddall, Manager

Canada's First Electric Tug

The first electrically-driven tug to be built in Canada was launched at Lauzon, Que., recently, when the "Prescott". Diesel-electric tug for the Canadian Pacific Car and Passenger Transfer Company's service between Prescott, Ont., and Ogdensburg, N.Y., slipped gracefully into the waters of the St. Lawrence after the traditional bottle of champagne had been broken across her bows by Mrs. McDuff, wife of M. McDuff, manager of the Canadian Pacific Great Lakes Steamship Service. As a pioneer feature in Canadian shipping, the Diesel-electric engines with which the new vessel is equipped, are of special interest to marine engineers. Each of 600 H.P., they are directly connected to twin generators capable of delivering 330 kilowatts, each at 250 volts, when operated at 245 revolutions per minute.

In operation, a car barge with three tracks for 16 hundred-ton cars, will be lashed to the starboard counter of the tug which it will be possible to control either from its own wheel-house or from the bridge of the car barge.

What Shall We Name The Baby?

A SYMPOSIUM BY INTERESTING PEOPLE OF TODAY
CONDUCTED BY WILLIAM A. LEWIN

To select a suitable name for each new baby that comes into the world is indeed an absorbing problem. Nearly 2,000,000 new babies were born last year. And yet there are less than 3,000 names to choose from. Parents search long for suggestions. Shall we create some interesting new names?

No. 26—DAVID S. TARR JORDAN EDUCATOR

The earlier Americans (and the sea, Louis, Martin, Clarence, Albert majority still) preferred the old English names. John (first), Richard, Elsie, Alice, Dorothy, Katharine, Robert, James, Charles, George, Gladys, Marian, Frances, Helen, Margaret, William, Henry, Mary, Jane, Sarah, etc., are still in the lead in most countries.

The Puritans chose the Bible names. David (first), Joseph, Daniel, Samuel, Isaac, Moses, Obadiah, Isaiah, Aaron, Amos, Hosea, Rebecca, Eliza, Beulah. Then the more euphonic of these Paul, Ruth, Rachel, Miriam, Mary and Muriel became generally popular.

Then the Baxon names became popular: Arthur, Alfred, Edward, Edwin, Oscar, Harold, Herbert, Edgar, Robert, Ella, Eileen, Edith, Ethel, and Elizabeth.

Names from the continent followed as Frank, Leonard, Frederick, Hor

REFRESHING EATS FOR THIS WEEK (BY BETTY BARCLAY)

Your children like cookies and brownies as much as you did when you were young. Three or four of these dainties with a glass of some cooling beverage makes a delightful lunch under the apple tree or out on the back porch. Here are two delicious recipes:

Gold Cookies
2 cups special cake flour, sifted
1 teaspoon baking powder
1/2 cup butter or other shortening
1 cup sugar, unbeaten
4 egg yolks, unbeaten
Sift flour once, measure, add baking powder and sift again. Cream butter, add sugar gradually, and cream together until light and fluffy. Add egg yolks, one at a time, beating thoroughly. Add sifted flour. Add flour. Chill. Roll into balls 1/2 inch in diameter. Roll some balls in mixture of chopped nuts and cinnamon, and remaining ones in tiny colored candies. Bake in moderate oven (350 degrees F.) 15 minutes, using lower grate, during first half of baking period and upper grate during last half. Makes 3 1/2 to 4 dozen cookies.

Brownies
3/4 cup special cake flour, sifted
1/2 teaspoon baking powder
1/3 cup butter or other shortening
2 squares unsweetened chocolate, melted
1 cup sugar
2 eggs, well beaten
1 teaspoon vanilla
1/2 cup walnut meats
Sift flour once, measure, add baking powder, and sift again. Add butter to chocolate and blend. Combine sugar and eggs; add chocolate mixture, beating thoroughly, then flour, vanilla and nuts. Pour into two greased pans 8x8x2 inches, and bake in moderate oven (350 degrees F.) 25 minutes. Cut in squares before moving from pan. Makes 50 brownies.

Peach Ice Cream
4 junket tablets
2 quart milk
1 pint cream
2 teaspoons vanilla
Crushed sweetened peaches
Warm milk slightly, add sugar and vanilla. Dissolve junket tablets in tablespoon cold water, stir into milk mixture quickly, pour into freezer can and let set about 30 minutes until firm. Place can in freezer, pack with ice and salt and freeze to thick mush. Add the cream, whipped if convenient, and the crushed sweetened peaches. Finish freezing. Save part of peaches to serve on top. Strawberries, bananas, pineapple, may be added in this way when making any junket ice cream.

Veal Dandy
1 1/2 pounds veal steak
Fat salt pork, cut in strips
Squares of thinly-cut bread
Salt and pepper
Sage
Little water
Put in a pan some butter, salt and pepper and a little sage (to give but a mere suggestion of its flavor). Then place in the pan tiny strips of thinly cut fat salt pork, then veal steak, cut thick, with bones removed. Season and add squares of thinly-cut bread, season again and place more strips of pork. Add a little water. Start in a hot oven, then turn low. It should be a deep rose color when done, with no trace of pork remaining.

Mint Julep
2 cups sugar
1 quart water
12 sprigs fresh mint
1 1/2 cups boiling water
1 cup orange juice
Juice 8 lemons
1 cup strawberry juice
1 pint grape juice
Boil sugar with 1 quart water 20 minutes. Chop mint and pour over it 1 1/2 cups boiling water. Let stand 5 minutes strain and add to syrup. Pour into punch bowl, add grape juice, dilute with cold water. Serve with mint leaves in each glass.

INTERESTING FOREIGN FOODS
Some of the most delicious recipes come to us from other lands. Foreign chefs have long known the use of sugar as a seasoning to blend and point-out flavors, rather than for its sweetening effect, and the following recipes are practically guaranteed to tickle the most finicky palate.

Tongue in Aspic
Wash and scrub a beef tongue in salted water and boil until tender. Remove skin and place the tongue in a saucepan. Add two onions, one stalk of celery, four cloves, and salt and pepper. Cover with liquor in which tongue was boiled. Add one blade of mace, one bunch of thyme, one bunch of parsley and one teaspoon sugar. Simmer for two hours. Remove tongue. For each pint of gelatin that has been soaked in cold water. Stir for two minutes over very low flame. Strain and pour over tongue. Chill thoroughly, garnish with watercress.

Peas and Onions
Cook separately, until tender, one and a half cups shelled peas and one half cup little onions. Heat four tablespoons thick cream in a saucepan. Add the peas and onions, shake lightly until well covered with the cream, and serve very hot. Add one fourth teaspoon sugar. Mix thoroughly and serve.

Health Service of the CANADIAN MEDICAL ASSOCIATION EYES

Good vision is priceless. There is nothing that could be offered to us which would tempt us in exchange for our eyes.

Because we can see we take it for granted that we will always have good eyesight, and we go ahead about our eyes in a most careless manner. Our eyes cannot be replaced; they have to last us throughout life. If we continue to abuse them, they are almost sure to be worn out at an age when we still need them.

Any person who has difficulty in seeing, who has frequent headaches whose eyes become tired or who has spots dancing before the eyes should have his eyes examined.

The reason for having the eyes examined is to find out whether or not there is an abnormal condition which requires treatment. Proper treatment will relieve the symptoms, but more important than relief of symptoms is the prevention of further damage.

Faulty vision is common. Vision defects should be corrected by glasses prescribed after a thorough examination.

We should always read and work in good light. The light should be steady and should fall so that our bodies do not cast a shadow on what we are doing.

The eyes should be protected from infection. Fingers must be kept away from the eyes as they are very apt to carry infection into them. Every person should have his own towel, this even among members of the same family. The roller-towel and the common towel spread infection, and if such a towel is used in drying the face, there is a real danger of carrying infection from the towel into the eyes.

If some foreign substance gets into the eye, it should be removed by a trained person. The eye is too precious to take chances on its being injured at the same time.

The eyes are part of the body and it should therefore not be forgotten that they are affected by the general health of the other parts. Good health which is secured through proper diet, rest, exercise, fresh air and elimination will be reflected in all parts of the body.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

DID YOU EVER STOP TO THINK

By
Edson R. Waite,
Shawnee, Okla.

The Rangoon Times of Burma, India, reports a meeting of the Indian Merchants, held in Karachi. The following resolution was adopted:

This meeting of the members of the Indian mercantile bodies of Karachi appeals strongly to the country in general and the mercantile community in particular to take up the swadeshi movement with firm determination and urges them to use all articles produced or manufactured in India unless it is impossible to obtain certain necessary articles of this country. The economic position of the country demands that every Indian must always insist on buying and using raw as well as manufactured articles produced in India, even at a sacrifice, not only as a patriotic duty in the present economic political crisis, but as a settled policy of national protection and well being. This meeting appreciates the patriotic spirit shown by the local people for twelve months and urges them to show the same spirit in the future.

The general idea of buying merchandise manufactured in your own country is a good one. Every person, before they purchase merchandise, should read the advertisements in their local paper and buy only those things that are manufactured in their own country.

SOME WEDDING CUSTOMS

Why does a bride wear a veil? Why is rice thrown over a bride's couple as they leave the church? Why is the wedding ring put on the fourth finger of the left hand? Why is an old shoe thrown after a married couple as they drive to the station? Why have a wedding cake?

The questions are asked and answered in London Answers.

The veil is but a continuance of the ancient custom that no man save her husband should see a woman's face, and not even him until after the ceremony.

The throwing of rice is another eastern custom. Rice is the staple food in this east, and throwing it symbolized a wish for plenty.

The choice of the fourth finger of the left hand for the ring is an old custom of pagan Rome. It was believed that a nerve went direct from that finger to the heart.

Shoe throwing is another adopted eastern custom. The Oriental bride's father gave an old shoe to the bridegroom as a symbol that he surrendered to him his parental right of leading his daughter.

The wedding cake is Roman in origin. A cake made of flour, salt and water was always eaten by the Roman couples in the presence of the priest. It formed part of the marriage rites.

Behind the question: "Who giveth this woman to be married to this man?" was the accepted belief that a woman was a "chattel," life furniture.

PROVINCE WILL KEEP
LONDON OFFICE OPEN
UNDER NEW DIRECTION

EDMONTON—No announcement regarding the appointment of a successor to Hon. Herbert Greenfield, whose resignation as agent-general for Alberta was announced recently, has been made as yet.

Premier Brownlee states that it is the government's intention to continue the agency for the province in London and that a successor will be named in good time before the resignation takes effect on January 1, next.

Why Corona is the CHAMPION PORTABLE of the World

CORONA is the World's Champion Portable on the following 8 exclusive points:

Strength: Corona has a rigid one-piece solid aluminum frame.

Simplicity: Fewer parts than any other standard keyboard typewriter.

Completeness: More big-machine features than any other portable typewriter.

Easy to Learn: Corona design is the result of 20 years' study of the needs of beginners.

War Service: An unequalled record for durability as the official portable of the Allied Armies.

Popularity: As many Coronas have been sold as all other portables combined.

Durability: Coronas purchased 20 years ago are still giving satisfactory service.

Beauty: Graceful in line, exquisitely finished in every detail.

Drop into our store today and see Corona. The minute you lay eyes on it you will realize why a million people use it—why so many business men, novelists, newspaper men, and students in schools and colleges prefer Corona to any other portable.

Come in and try Corona with your own hands. See how speedy it is—how smoothly it operates. If you can't come to the store, simply telephone us and a Corona will be sent to your home or office for examination. There is no obligation.

sign to the dragon-carved figure-
head which rests on its pedestal in
Stanley Park overlooking the wa-
ters of Burrard Inlet. The figure-
head is that of the old Empress of
Vancouver's victorious applause.ATTEMPT TO BRING
OLDEST OF COLONIES
CLOSER TO CANADAOTTAWA—Acquaintance and un-
derstanding between Canada and
Newfoundland is now being sought.
By distance the two dominions are
not far apart. It is only 154 miles
from North Sydney, Nova Scotia to
Port au Basque, Newfoundland, yet
the two people do not mix, and
do not know each other. On neither
side can it be said that there is an
intelligent conception of the other's
problems.One of the first common ties which
has existed between the two adjacent
British Dominions is the recent entry
of Newfoundland as a member of the
Good Roads Association. Due to this
a full measure of cordiality will be
extended to Newfoundland at all the
conventions throughout the year.Newfoundland is a generous buyer
of Canadian merchandise. Exports
to the island are over \$12,000,000 a
year. Apart from the iron ore mined
by the British Empire Steel Corpora-
tion at Bellefleur Canada buys less
than a million a year from Newfound-
land. Her imports from the United
States are \$9,000,000 a year and
from the Mother Country only
\$5,000,000.Representatives of the Newfound-
land Government will attend the an-
nual convention of the association to
be held in Quebec in September and
all future conventions and meetings
at the interprovincial conferences. Al-
ready the Anciens Colonies has extend-
ed to the association an invitation
to hold the annual convention in St.
John's. It is understood that the new
association which will be one of the
outgrowths of Newfoundland's partici-
pation in the deliberations of the
Good Roads Association will be a
greater measure of understanding
and sympathy between the two Brit-
ish Dominions.

TOWN PLANNING IN THIS PROVINCE

Being a series of short articles ex-
planatory of the provisions of the
Alberta Town Planning Act and Reg-
ulations thereunder.By
HORACE L. SEYMOUR
Provincial Director of Town PlanningArticle 4
HousingOne of the principal objects of
town planning is to provide desirable
domestic subdivisions regulations
and provisions of the Town Planning
Act referred to in previous articles
have been drafted to accomplish this
end. A general regulation is that lots
for residential purposes shall be at
least 50 feet wide, at least 100 feet
deep with a minimum area of 5,000
square feet. In a new subdivision
streets and similar structures cannot
be erected in a residential district or
zone; adequate streets and lanes are
to be provided. The thoughtless and
indiscriminate placing of houses on
unsubdivided lands without reference
to existing or future development can
now be curbed. But where there ex-
ists a proper community spirit such
infractions of the "laws" of common
sense, of community economy will
probably not be considered by intend-
ing purchasers or sanctioned by theowner. If, however, through thought-
lessness, through ignorance of exist-
ing legislation or regulations these in-
fractions occur, it may mean consid-
erable extra expense to the owner to
have necessary surveys subsequently
made, or in other cases, to move
buildings recently erected.In general, residences are to be
erected but one to a lot, that lot form-
ing part of a registered subdivision.
Any further information may be ob-
tained by writing to the office of the
Director of Town Planning, Parliam-
ent Buildings, Edmonton.

Vancouver's victorious applause.Impressively simple ceremonies
were held at Fort William recent-
ly for the late F. E. Trautman, for
the past 18 years Canadian Pacific
Press representative in Western
Canada. He was buried in the city
where a large part of his career
as a pioneer western newspaper-
man was passed as editor of the
Fort William Times-Journal. The
cities of Fort Arthur and Fort Wil-
liam were officially represented as
was also the railway company
while a large number of private
citizens paid their last respects.S.S. Princess Joan, new 5,000-
ton steamer of the Canadian Pacif-
ic Railway's British Columbia
coast fleet, became a floating
hotel at Vancouver recently when
six members of the Grand Masonic
Lodge of British Columbia swam-
med aboard for their 59th annual
convention at Fossil Island.The Algonquin Hotel at St.
Andrews-by-the-Sea, has opened
ahead of its usual time with three
conventions booked prior to the of-
ficial opening of the St. Andrews
season the last week in June.Fifteen years ago the average
sen in Canada laid 50 eggs annu-
ally, according to Professor E. A.
Lloyd of British Columbia. This
number has now grown to 70.
From extra eggs alone, Canada has
produced an increased revenue of
more than \$300,000,000.Nearly one billion dollars was
invested in central electric power
stations in Canada at the end of
1928, or \$56,919,503 to be exact,
according to an official report is-
sued by the Canadian Government
Bureau of Statistics. This is twice
the amount of the investment in
this industry in 1920 and over \$90-
300,000 more than the total in
1927.

KARING AR For Your

Terrible spelling we admit, but it got your attention, didn't it.
Let's hold it just a moment while we tell you what we know about
Car Care:We know that to give you perfect satisfaction your car must be
co-ordinating in every unit. Timer right, gas line clean, cylinders
clear of carbon, no brakes dragging and all the hundred and one
little details absolutely RIGHT. Oil must be of proper density and
lubricating quality and the gas be peppy enough to give you maxi-
mum, mileage. And knowing this we make "perfection" the "pass-
out" test of every job of repairing that goes out of our work shop.We give you free air, water and crank service and convenient gas
and oil service under cover at two visible curb filling stations. And
we do it courteously. Courtesy is a habit with us. We'll be glad to
see you. Drive in.

SHE TOUCHES A BUTTON and levels the mountain

There it is on Monday morning, looming formidably above every other
household task literally a MOUNTAIN OF DIRTY CLOTHES TO
BE WASHED.Either it means hours of back bending
scrubbing, wringing ... or it means SIMPLY
PRESSING THE BUTTON that STARTS
YOUR ELECTRIC WASHER. Into the sudsy
water each garment goes the GENTLE
BUT POWERFUL churning motion elimi-
nates every particle of dirt and out again
IT COMES MIRACULOUSLY CLEAN. It's
AS SIMPLE AS THAT.A wide range of
modern electrical
appliances may now
be purchased direct
from the Calgary
Power Company on
a small down pay-
ment — balance to
be paid with your
regular monthly
light bills.

GLASSES

Glasses that merely correct your eyesight
serve your purpose but half way. They must
"fit your features," too. In other words, be
"becoming to your face."As expert Opticians we can satisfy you on
both these points. We have in stock or can
make up for your special needs very appro-
priate and neat-looking models. Stop in and
ask about them.
